

TEDI HANAFIAH

web Developer

About Me

Fullstack Web Developer specializing in Laravel for backend development and React.js for frontend development. Experienced in building responsive, scalable, and efficient web applications, from database design and API development to modern user interfaces. Highly motivated to learn and committed to delivering high-quality digital solutions.

Experience

- Freelance

2022 - Present

Fullstack | Laravel, React & Vue JS

Developed and maintained various web applications using Laravel for backend and React.js / Vue.js for frontend. Experienced in building complete web systems, including database design, API development, and modern responsive user interfaces.

Key projects include:

- Developed the official website for SIAP Indonesia at siapindonesia.co.id.
 - Developed the school website for Media Ardah at mediaardah.com.
 - Contributed to several other web projects, including company profile websites, blogs, and web-based systems.

Focused on delivering responsive, scalable, and efficient web solutions with strong attention to performance and user experience.
- Intern - Diskominfo

2024 - 2025

Fullstack | Laravel

Designed and developed a web-based E-Guest Book (E-Tamu) application using Laravel to digitize visitor management. Responsible for the end-to-end development process, including UI/UX design, database architecture, system development, and implementation of a responsive and user-friendly application.

Project

- SIAP INDONESIA - siapindonesia.co.id

Built a company profile and blog website using Laravel with a responsive interface and content management features.
- MEDIA ARDAH - mediaardah.com

Built a responsive school website to provide information about school programs, activities, and announcements.
- Other Projects

Built several other web projects including a Visitor Management System (E-Tamu) using Laravel, along with various landing pages, static websites, and other web-based systems.
